Thank you for your interest in partnering with Action Renewables.

As Chief Executive Officer I am proud to lead an enthusiastic workforce who share passion and commitment to raising awareness about climate change.

It's an exciting time to work with Action Renewables, we have accomplished great things since our establishment in 2003 and we will continue to develop new business lines and services that support our charitable services.

Everyone in our team has a chance to play an active part in supporting renewable energy and helping deliver decarbonisation, which has always been and remains the central focus of what we do as a charity.

By joining our Network, you will have a chance to make a real difference in protecting and improving the environment while being part of a welcoming team of people who will support your company's sustainability goals.

This membership pack outlines in more detail the opportunities for your organisation to get involved and what we offer.

Thank you for your interest in Action Renewables.

Terry Waugh
Chief Executive Officer

What we do

We are the leading provider of renewable energy expertise in Northern Ireland.

We provide support for renewable energy development

We collaborate with academic and research establishments

We offer green electricity brokerage services and trading renewable energy certificates.

We provide consultations regarding opportunities for reducing energy consumption

We trade in the Irish Electricity Market - ISEM

We focus on energy efficiency, renewable transport, renewable products, and smarter applications of renewable energy

Now it's more important than ever that we continue our on-going work to remove the barriers that hinder the rate of renewable energy penetration.

We are a small but well-structured organisation with 30 permanent members of staff, and we are based at our offices in Boucher Business Studios in Belfast.

Our activities are principally financed from the trading functions of our subsidiaries, particularly Action Renewables Energy Trading (ARET) Ltd. ARET is a private company, and a wholly owned subsidiary of Action Renewables. ARET takes its direction from and reports to the Board of Action Renewables.

Our vision

Our vision is to create a Northern Ireland which recognises the serious impacts of climate change and will take measures to prevent and mitigate against those impacts, through using renewable energy, energy efficiency, renewable transport and renewable products.

Our mission

Our mission is to continue carrying out our business activities with a clear direction set by our charitable objectives:

1.
To advance to the benefit of the public, the protection and improvement of the environment, through the promotion of energy efficiency and renewable energy; and

2.
To advance the education of the public in energy efficiency and renewable energy

Climate Action Pledge

We are proud to have signed the Climate Action Pledge, making an important public commitment to reduce greenhouse gas emissions by 50% by 2030.

The Climate Action Pledge challenges businesses to take action on the climate crisis. The campaign puts Northern Ireland businesses at the forefront of action on the climate emergency.

Our Charitable Activities

Our charitable activities reflect our views on the need for climate change mitigation and the need for renewable energy.

As a charity we are proud to support charitable projects where renewable energies can be utilised for the benefit of our local and international communities.

This year Action Renewables has donated £14,000 to Mulanje Mission Hospital in Malawi towards the installation of solar panels and battery storage.

Two Action Renewables staff members, Jonathan and Lana, recently visited Mulanje Mission Hospital in April 2023 – you can read about their trip here.

Action Renewables is continuing its commitment to fund a scholarship programme with Ulster University. The Action Renewables Energy Storage Scholarship will be open to Ulster University students starting an MSc in Energy Storage (full time) at the Belfast Campus. As a charity, Action Renewables aims to mitigate against the effects of climate change, and this new Scholarship is intended to support students in that goal.

Our Solar PV Programme to support not-for-profit organisations in reducing their energy costs and CO2 emissions by offering low-cost electricity from renewable generation.

East Belfast Enterprise is one of many beneficiaries availing of our Solar PV support programme.

Membership opportunities

Introduction

We are gathered at a crucial moment in time – where innovation, policy, and sustainability come together to create a cleaner, greener world. And in the heart of this transition, in Northern Ireland, stands Action Renewables and we invite you to become an integral member of our Network.

The impact of your membership

Every new member brings us closer to a future where:

- Renewable energy is accessible to all
- Communities are empowered to take control of their energy
- Carbon emissions are reduced, helping to combat climate change

Whether you are passionate about sustainability, eager to reduce your carbon footprint, or simply want to make a difference, your membership can help drive lasting impact.

Benefits of Membership

- Stay Informed – receive exclusive updates, newsletters and updates on the latest developments in renewable energy.
- Invitations to events, workshops, and campaigns
- Opportunities to hear from industry experts and innovators in green technology
- Members support real-world benefits – such as solar PV installations in schools, charities and community organisations across NI and beyond
- Support real change – Recognition on Action Renewables website and social media
- Connect with like-minded people – Be part of a growing community committed to environmental responsibility.
- Public acknowledgement of your support for renewable energy
